Exceptional Quality
and Engineering

commercial interior

spa interior

Satellite Suites International Series restroom trailers can be ordered with the Commercial, SPA or Luxury interior. The Commercial interior has a warm, neutral interior, while the SPA series has shades of sea-foam green. Our Luxury interior has contrasting shades of dark and light browns, creating a very elegant appearance.

The similarities between all these styles is the superior materials used in manufacturing. All Satellite Suites trailers are made from non-wood materials to prevent damage caused by moisture being trapped between

the walls, flooring and roof. This feature will eliminate costly repairs and unwanted odors over the life of the trailer.

The most economical trailer to ship is our 10 foot trailer. One trailer can fit in a 20' high cube or you can fit three trailers in a 40 foot high cube. All other sizes will not fit in a container.

To learn more about Satellite Suites trailers, please contact your Area Manager or visit us on-line at www.satelliterestroomtrailers.com
